

Ta Minh Khang

Software Developer

An Giang • khangta67@gmail.com • <https://github.com/Aquarius2301> • 0943213549

Education

FPT University Can Tho

Bachelor of Science in Software Engineering | GPA: 8.5/10

2021 - 2025

- Achieved **Honorable Student** in 7 semesters and the **Top 5 students** of the Software Engineering (Spring 2023).

Experience

Act Brain Vietnam

Backend / Frontend Intern

Ho Chi Minh

Jan 2024 – Apr 2024

- Migrated a legacy enterprise system from **Zend Framework** to **Laravel** and **React (TypeScript)**, optimizing codebase maintainability and boosting development efficiency.
- Designed and developed secure, high-performance **RESTful APIs** using PHP to power front-end features.
- Built responsive, dynamic, and reusable user interface components using React and TypeScript, enhancing overall user experience.
- Created and executed unit tests to validate core system logic, ensuring platform stability and reducing post-deployment bugs.

Projects

My Blog - Social Blog Platform

Backend, Frontend

<https://github.com/Aquarius2301/MyBlog-System>

2025 – 2026

- Developed a full-stack social blogging platform enabling users to seamlessly create multimedia posts, upload images, and interact via real-time likes and comments.
- Designed and implemented robust **RESTful APIs** using **ASP.NET Core** following a clean, layered architecture for scalable backend management.
- Integrated secure identity management using **JWT** authentication with an advanced Access and Refresh Token mechanism.
- Leveraged **Gemini API** to architect an AI-driven module that analyzes and interprets Tarot spreads, delivering personalized, context-aware insights to users

AI Workspace — Team and Project Management

Backend, Frontend

<https://github.com/Aquarius2301/AI-Workspace>

2026 – now

- Built a Jira-like management platform using **.NET 8 (Clean Architecture/CQRS)** and **React 19 (TypeScript)** with role-based access control and live demo deployment.
- Integrated **Google Gemini API** to assist with workspace search and automated task management.
- Implemented secure auth using **JWT**, **HttpOnly cookies**, **refresh-token rotation**, and **server-side session revocation**, alongside rate-limiting against brute-force attacks.
- Developed a responsive **Kanban board with drag-and-drop**, TanStack Query state management with optimistic updates, multi-language support (EN/VI), and light/dark modes.

Skills & Certifications

- Languages:** English (Professional Working / Strong Reading & Writing), Vietnamese (Native)
- Backend:** C#, ASP.NET Core, Entity Framework Core, RESTful API, JWT, SQL Server
- Frontend:** React (TypeScript), TanStack Query, Ant Design (AntD)
- Tools:** Git, Postman, VS Code, Swagger
- Certifications:** Google Certified Gemini Educator (2026)
